1️⃣ PRODUCT REQUIREMENTS DOCUMENT (PRD)

Workplace Ethical Risk Reporting Platform (SaaS)

---

1. Executive Summary

The Workplace Ethical Risk Reporting Platform is a secure, enterprise-grade SaaS solution designed to enable confidential reporting of ethical concerns within corporate environments. The platform facilitates anonymous submissions, structured investigation workflows, executive oversight, and secure evidence management, while maintaining strict data privacy and governance standards.

The system is designed for mid-to-large enterprises requiring compliance-grade internal reporting infrastructure aligned with corporate governance, whistleblower protection, and operational transparency standards.

---

2. Business Objectives

- Provide a secure and anonymous ethical reporting channel.
- Reduce fear of retaliation.
- Ensure structured case lifecycle management.
- Improve investigation transparency.
- Enable executive-level risk visibility.
- Maintain enterprise-grade security and confidentiality.

---

3. Stakeholders

3.1 Reporter (Employee / Faculty – Anonymous)

- Submits complaints.
- Uploads supporting evidence.
- Tracks case using unique Case ID.
- No identity stored.

3.2 HR / Investigator

- Authenticated operational user.
- Manages case lifecycle.
- Reviews evidence.
- Updates status and resolution.
- Accesses analytics.

3.3 Admin

- Authenticated governance user.
- Creates and manages HR accounts.
- Oversees system-level configuration.

- Monitors platform usage metrics.

---

4. Functional Requirements

4.1 Anonymous Reporting

- Access Key–gated entry.
- Structured complaint form.
- Optional secure evidence upload.
- Auto-generated Case ID.
- Default case status: “Open”.

4.2 Case Tracking

- Case ID-based lookup.
- No complaint history listing.
- Status and resolution summary view.

4.3 Case Management (HR)

- Secure login.
- Case list with filtering.
- Status transitions (Open → Under Review → Resolved).
- Resolution notes.
- Evidence access via signed URLs.

4.4 Analytics

- Complaint volume by category.
- Status distribution.
- Trend analysis over time.
- Resolution rate metrics.

4.5 User Management (Admin)

- Create HR accounts.
- Disable/enable HR accounts.
- Password reset management.

---

5. Non-Functional Requirements

- No reporter identity storage.
- Encrypted database storage.
- Secure file storage with private buckets.
- Role-based access control.

- WCAG-compliant UI accessibility.
- Audit-conscious architecture.
- Scalable SaaS-ready structure.

---

6. Security Requirements

- JWT-based authentication for HR/Admin.
- bcrypt password hashing.
- Signed URL-based evidence access.
- File type validation.
- Rate limiting on Access Key endpoint.
- HTTPS-only deployment.

---

7. Out of Scope

- External legal integrations.
- Real-time messaging systems.
- AI-based investigation automation.
- Public complaint visibility.
